- N O T E S**
1. Read in conjunction with Architects and other contract drawings and with the Specification.
  2. This drawing to be read only for details of structural elements or siteworks as indicated by the drawing Title.
  3. Structural steelwork detailed on this drawing shall be execution class . It shall be protected as per the Specification Section H.O - System .
  4. Existing services, foundations, structural elements and other works shown on this drawing are based on limited information and are to be regarded as indicative. The Contractor shall accurately locate and determine all existing works before putting new work in hand, and shall inform the Engineer. See the specification also.
  5. Any general setting-out dimensions shown here are not definitive - see the Architects drawings. See the Specification Section A also.
  6. Beneath pavements and ground-supported floor slabs, excavate, make up levels as necessary, and prepare the formation all in accordance with Section C of the Specification.
  7. Foundation formations to be in the following soil stratum(s) (see soil investigation report):
