13.05.2025	Shankill Beach	Over the past few years, Shankill Beach has seen regular and increasing use by nearby residents. It is popular with swimmers, families, walkers, and paddlers, especially on weekends and warm days, when there are always people on or in the water!
13.05.2025	Shankill Beach	Over the past number of years, Shankill Beach has seen a notable increase in use by local residents and visitors alike. As a daily sea swimmer and resident of the area, I have personally observed a consistent presence of beachgoers and bathers during the summer bathing season (1st June to 15th September).
19.06.2025	Williamstown/Blackrock Martello Tower	Williamstown has been a recreational bathing area as seen on early 1880s maps of Dublin. It is still used today on a daily basis by groups of swimmers who meet daily at high tide. On average in winter months it has 20-40 users per day and in summer over 100. I am a resident of the williamstown area and many of the bathers are residents of williamstown, st helens, blackrock and boooterstown but also come daily from as far afield as Kildare or Drimnagh. Water safety and quality is paramount to us.
