PLANTING NOTES

- All landscaping is subject to the approval of the local authority.
- All landscaping will be carried out by a competent landscape contractor and in accordance with the BS3936.
- Topsoil will be supplied in accordance BS3882. All trees will be planted into a 90-120cm3 of topsoil, ornamental shrubs into 45cm depth, and grass into 15cm depth.
- Trees sizes will be as indicated and all trees will be staked and tied appropriately.
- Grass areas are to be seeded with a general purpose amenity grass mix suitable for the site conditions.
- Following the completion of all construction works, a 3 year management plan is to be prepared to ensure the longevity of the existing and newly planted landscape. The landscaping will be maintained by the contractor for a minimum 18 months defects liability period, and there after for 12 month running periods.

IMPLEMENTATION OF PLANTING

- Planting within red line area and along boundaries to be carried out in the first available season after the completion of construction works in phase one (current planning application).
- Planting associated with potential future phases to be carried out in the first available season after the completion of construction works in future phases (not part of this planning application).
