

Project: Proposed Development of Shanganagh Park Masterplan – Phase 1, Shankill, Co. Dublin
Information: Age Friendly & Inclusive

- The park upgrade will cater for all users and the local community will be encouraged to engage and use the facilities.
- Sports facilities are largely inclusive and cater for a wide variation of users. The addition of a sprint track, calisthenics, improved paths and other elements will encourage more active participation over a wider group of users.
- Any fencing being installed is minimal and generally for safety and security reasons. While there will be a low fence around the sprint track, the pitches will be open to allow and promote public access and public use. The facilities are for everyone to use and fencing will not be installed around the pitches now or in the future.
- There is additional seating throughout and improved access over the DART line. This will include resting and viewing areas for those who may need a rest after an initial climb.
- Public toilets are provided at the cemetery and additional public toilets will be accommodated at Shanganagh Castle as part of the masterplan as well as a coffee shop and ornamental gardens.
- Additional disabled spaces will be provided at the existing carpark adjacent to Shanganagh Cemetery outside of this development.
- Additional facilities will be provided adjacent to Shanganagh Castle as part of the masterplan including a boules/ petanque court, yoga space, etc.

Note: Some of these are outside the scope of this proposed development but are part of the overall masterplan.
