

FERNHILL PARK & GARDENS Surface Water Drainage Plan

- Lands Drains - 100mm Pipe
- Land Drains - 225mm Pipe
- Infiltration Trench - 350mm Pipe
- Aco Type Channel
- Attenuation/Infiltration Zone - Clean Stone
- Naturalised Wetland
- Solid Pipes - min 150mm
- Ramp to Direct Surface Water

Note:

Surface water run-off from paths/roads etc will naturally infiltrate into the soft areas except as shown.

All drainage is designed in accordance with the GSDS with attenuation in soft landscape areas where possible.
